- **Websockets** - Pusher w/ Echo Js for real-time updates
- **Stripe API Integrations** – Implemented payment flows including one-time payments and subscriptions (**via the Stripe webhook**) as well as payouts. Additionally, generated audit files in XML format for reporting and compliance
- **Laravel Packages** - Socialite (Google, Facebook, GitHub OAuth), Cashier, Filament PHP, Breeze, Bagisto, Backpack, Laravel PDF
- Apache (Basic knowledge)

WORK EXPERIENCE

Freelance Web Developer - [My portfolio can be found here: lubodev.com](https://lubodev.com)
JUNE 2024 – NOW

OASIS Solutions -Junior Developer Internship -
FEB 2025 – NOV 2025 (GOVERNMENT PROGRAM THAT ENDS IN NOVEMBER)

During this period, I combined a Junior Developer internship with ongoing freelance work, allowing me to gain both team-based professional experience and independent full-cycle project management skills.

- **Internship:** Worked as a Junior Developer through a government-sponsored program, contributing to client projects by assisting with backend development (Laravel, PHP, MySQL) and a bit frontend implementation (JavaScript, HTML with Tailwind).
- **Freelance (lubodev.com):** Independently built and delivered multiple client projects from scratch, handling every stage of the process:
 - Client interaction – initial meetings, gathering requirements, creating documentation, and aligning expectations.
 - Project management – planning timelines, communicating progress, and maintaining strong client relationships.
 - Development – designing and coding complete web solutions (frontend & backend) while continuously learning new technologies as needed.
 - Design support – created visuals and layouts using tools such as Photoshop, Canva, and Adobe Express.
 - Delivery – deployed production-ready websites, provided support, and ensured client satisfaction.

This combination of internship and freelance projects gave me well-rounded experience in both collaborative team environments and independent end-to-end development, strengthening not only my technical skills but also my communication, organizational, and problem-solving abilities.

DXC Technology - Junior Project Manager

SEPTEMBER 2023 - June 2024 (10 months)

- Maintaining communication between teams to ensure tasks are distributed correctly
- Creating and organizing Excel and PowerPoint documents for client projects
