- Apache

WORK EXPERIENCE

Ardes BG – PHP Developer

December 2026 – May 2026

Main responsibilities included:

- Backend development using Laravel, PHP, and MySQL.
- Frontend implementation and maintenance using HTML, CSS, Bootstrap, JavaScript, and AJAX.
- Identifying bugs and issues in existing systems and assisting in troubleshooting processes.
- Creating and documenting development tickets/tasks for senior developers based on reported issues and business requirements.
- Communicating with different departments and stakeholders to clarify functionality requirements and expected system behavior.
- Assisting with feature implementation, bug fixing, and maintenance of client web applications.
- Collaborating with senior developers on ongoing projects and gradually taking ownership of smaller development tasks.

OASIS Solutions – Junior Developer Internship (Government-sponsored program)

February 2025 – November 2025

Worked as a Junior Developer through a government-funded internship program, contributing to client projects in a collaborative team environment.

Main responsibilities included:

- Backend development using Laravel, PHP, and MySQL.
- Assisting with frontend implementation using JavaScript, HTML, and Tailwind CSS.
- Supporting the development and maintenance of client web applications.
- Collaborating with team members on feature implementation and debugging tasks.
- Gaining practical experience with real-world development workflows and project structures.

Freelance Web Developer – lubodev.com

June 2024 – Present

Worked independently as a freelance web developer, building and delivering complete client projects from scratch while managing every stage of the development process.

Key responsibilities included:

- Client communication – conducting initial meetings, gathering requirements, creating documentation, and aligning project expectations.
- Project management – planning timelines, communicating progress, and maintaining strong client relationships throughout the development cycle.
- Full-stack development – designing and developing complete web solutions using technologies such as Laravel, PHP, MySQL, JavaScript, HTML, and Tailwind CSS.
- Continuous learning – adapting to project requirements by learning and implementing new technologies when necessary.
- Deployment & support – deploying production-ready websites, providing maintenance, and ensuring long-term client satisfaction.

This freelance experience strengthened both my technical abilities and my communication, organization, and problem-solving skills while working independently on real-world projects.

DXC Technology – Junior Project Manager **SEPTEMBER 2023 – JUNE 2024 (10 months)**

- Maintaining communication between teams to ensure proper task distribution
- Creating and organizing Excel and PowerPoint documents for client projects
- Planning next steps based on client requirements
- Monitoring the progress of ongoing projects

C3i Solutions – Technical Support Representative with English **SEPTEMBER 2021 – SEPTEMBER 2023 (24 months)**

- Providing support for various internal software systems via phone, email, and chat
- Assisting users with the usage of different systems (web and desktop applications)
- Creating user accounts via phone requests or submitted tickets
- Escalating cases to different technical teams when necessary
- Handling emergency escalations (urgent cases) assigned by the Team Leader during shifts

Southwestern Advantage – Direct Sales Representative
(Door-to-Door Sales in the USA)

JULY 2021 – SEPTEMBER 2021 (3 months)

This was my student summer internship in the United States, where I focused on developing communication, negotiation, time management, and problem-solving skills, as well as overall business management abilities.

Sold educational materials for children door-to-door, including books, applications, and interactive websites (products covered all age groups – from baby learning materials to SAT and ACT college preparation resources).
Worked in Fresno, California.
